

D.I.Y. ROLL-UP BLINDS

DIY Roll-Up Blinds are generally hemmed & reinforced on sides & top with a pocket sewn into the bottom to take Pipe/Dowel/Etc. The top of the Blind can be fixed by screwing through reinforcing or eyelets can be fitted to attach to hooks etc.

Coolaroo Domestic, Abshade Domestic Plus or Comshade Shadecloth are recommended for Custom Made Blinds because they have been heatset & therefore hold their shape better than other fabrics, although some material shrinkage is normal.
