

***brella brace helps stop your umbrella  
blowin' away.***

**brella brace directions for use:**

**1.** Feed the loop under the brellas plastic cap, or secure through the vent as shown. (If your umbrella does not have a plastic cap, refer to pic for alternative attachment methods)

**2.** Secure your sandpeg a little outside your umbrella, in the direction of the prevailing wind. Attach the bungee and take up the slack with the adjuster. Take care not to over tension, as the bungee will absorb moderate wind force.

Please note - brella brace is not designed to be used in extreme conditions especially when unattended. No responsibility will be accepted for any damage cause by wind or misuse. Manufactured by P.Waugh 99 Sorensen Rd Gympie 4570
