## **G - GAZEBOS**

**All instant fold and portable gazebos are for short term temporary use only, they are not designed to be a permanent structure.**

**Do not leave gazebo unattended.**

**In rain make sure water does not collect on the canopy otherwise it may collapse the frame.**

**In heavy rain or wind the canopy should be removed.**

**Failure to follow these guidelines will void your manufacturer's warranty.**

**SPECIAL ORDER ITEMS CANNOT BE CANCELLED OR CHANGED ONCE THE ORDER HAS BEEN PLACED.**

**Special Order Items may take 4 – 6 working days to arrive in store.**

**\*\*OZtrail warrants all OZtrail branded products against defects of material or manufacture for a period of 1 year from the date of initial purchase.\*\***

# G - GAZEBOS

## DELUXE GAZEBOS

**Oztrail Deluxe Gazebos** feature a frame with struts along each side and struts from the centre of each side to the centre of the gazebo (on a horizontal plane), which then has a post (or posts) that lifts the roof into place. This design gives more stability in windy conditions and is recommended for all day events like markets, sports day, camping, corporate or trade events.

### Features:

- Anti-Pooling Arms
- 300 Denier UVTex Suntough Polyester Canopy
- Triple Layer 600 Denier Polyester Reinforcing Points in key wear locations
- Silver Internal Lining on canopy blocks more than 98% UV Radiation
- Externally Bound Roof Line Seams to improve tension in the canopy
- Large Roof Vents for improved heat and wind dissipation
- Fire Retardant Material used in canopy
- Heavy Duty wheeled carry bag
- Certified by Australian Engineers to the Building Code of Australia for sufficiency of design for temporary shade structures

# SS - SHADE SAILS

## READY MADE SHADE SAILS

Ready Made Shade Sails are all manufactured using a high quality HDPE knitted shadecloth and all have curved sides with webbing sewn along the sides and a stainless ring in each corner for tensioning purposes. The shadecloth offers up to 95% UV Blockout and because the fabric breathes it keeps the area much cooler and more comfortable.

### COOLAROO COMMERCIAL SHADE SAILS

Reinforced Edges and Stainless Ring in each Corner

95% UV Commercial Grade Shadecloth

Material Weight 340gsm

*\*15 Year Manufacturer's Warranty against UV Breakdown of Fabric\**

The warranty does not cover you if the Shade Sail is exposed to chemicals (chlorine, etc), or placed near excessive heat or an open flame (BBQ area, Gas Heaters, etc).

ITEM CODE	SIZE	COLOUR	PRICE
<u>CCS5.4</u>	5.4m x 5.4m Square	Beech, Graphite, Stone	\$ 315.00
<u>CCT5</u>	5.0m x 5.0m x 5.0m Triangle	Beech, Graphite, Stone	\$ 215.00
<u>CCT6.5</u>	6.5m x 6.5m x 6.5m Triangle	Beech, Graphite	\$ 298.00
<u>CCR5x3</u>	5.0m x 3.0m Rectangle	Beech, Graphite, Stone	\$ 250.00

### \*IMPORTANT INFORMATION\*

Please Note: Shade Sail sizes are actual size when the sail is laying flat on the ground; therefore your distance between anchor points will need to be further than the shade sail size.

All sides of the Shade Sails are curved at approximately 10% of the length between corners. For example, a 5.4m long side can lose 54cm at the deepest point of the curve. We ask that you carefully consider the size of the Shade Sail and whether it will adequately cover the area you are looking to shade & protect.

**NO REFUNDS WILL BE GIVEN ON SHADE SAILS UNLESS THEY ARE FAULTY**

# B - BLINDS

## RETRACTABLE BLINDS

### 95% UV Shadecloth

Retractable Blinds feature a one-touch heavy duty spring for easy operation and can be screwed into the extended base mounting brackets for extra safety.

Base brackets can be substituted (at an extra cost) for Bunji Loop & Knobs/Awning Hooks for installation as verandah blinds. Colour co-ordinated head and base metal brackets ensure a stylish, professional finish to your home.

## CANTILEVER UMBRELLAS WIND RATED

**\*\*PRICES ARE FOR UMBRELLA, INCLUDED PROTECTIVE COVER & BASE ONLY.  
ADDITIONAL BASES & PROTECTIVE COVER PRICES ON [PAGE 44](#)\*\***

Wind Rated Cantilever Umbrellas feature a side pole which allows more freedom of movement under the umbrella and also gives the user the handy option of being able to rotate the umbrella 360° to move the shade. Wind Rated Cantilever Umbrellas also feature tilting options to enable shade to be directed to different areas without having to move the umbrella itself.

Wind Rated Cantilever Umbrellas are available in various models from 2.5m up to 5m in diameter and carry a wind rating of up to 100km/hr, depending on the model.

Wind Rated Cantilever Umbrellas are built using materials of the highest quality and strength. Wind Rated Cantilever Umbrellas are designed to be installed permanently however the umbrella can be removed if need be.

Excessive wind conditions can cause great stress and damage to the umbrella frame as well as danger to people and nearby surroundings.

**All wind ratings & specifications have been provided by the Manufacturers,  
The Shade Centre accepts no responsibility for any claims made.**

### SIENA CANTILEVER UMBRELLA – Wind Rated up to 50km/hr

The Siena cantilever umbrella is manufactured by Shelta Australia.

It has a Silver Anodised Aluminium Frame. The canopy is UV Treated Acrylic Canvas, which is Mildew and Rot Resistant and offers over 98% UV Protection/UPF50+. Comes with a protective cover.

## SHELTERS / CABANAS

Ideal for use at the beach, sports days, picnics and more, our range of beach umbrellas and shelters only take a couple of minutes to open and close and are all lightweight and come with their own carry bag. When not in use, store your umbrella or shelter in a dry, shaded location. Should the frame or fabric become coated with salt spray, rinse well with fresh water and allow to dry. Fabric may be treated with a fabric protector such as 'Scotchguard' for additional protection.

Soiling can be minimised by simply brushing off dirt before it becomes embedded in the fabric or spot cleaning soon after stains occur. To clean umbrella canopies and beach shelters, lightly brush the fabric with a mixture of mild detergent and warm water. Rinse thoroughly and leave the umbrella or shelter open until completely dry.

**Umbrellas and beach shelters can be a hazard on the beach if not properly anchored. Do not use beach umbrellas in windy or gusty conditions. Bury the lower pole to the recommended depth and close the umbrella if left unattended. Be aware of the people around you when opening and closing umbrellas and beach shelters.**
